

What is su-re.co?

Established in 2015, su-re.co (Sustainability and Resilience.co) is an environmental Think-Do-Be-Tank based in Bali. Our vision is to be a **reliable gift maker** for the planet and the future. It is to create a **sustainable and resilient community (be) that can transform good intentions and deep thought (think) into direct action (do)**. Our mission is to make the vertical integration of sustainability which synergies research, technologies, and learning by meaningful business. In short, su-re.co's strategy is "a vertically integration for sustainability".

Indonesia Becomes One of the EU-funded Research Projects' Case Studies

think-tank

Indonesia is one of the world's biggest emitters, with emissions from land-use contribute significantly (65.5%) to the nation's total GHG emissions (USAID, 2017). To address emerging impacts of climate change, Indonesia has pledged to reduce its greenhouse gas emissions (GHGs) by 29% by 2030 to meet the Paris Agreement.

However, this international climate mitigation policy and strategies often do not consider the nuanced needs and real conditions as well as opportunities present at the regional level, resulting in.....

Get the Climate-Smart Products on Tokopedia!

Good news for you giftmakers! We have our climate smart products updated on Tokopedia! Now you can enjoy the products from local farmers that will also turn into a sustainable actions to fight climate change. 25% of sales will be used for biogas installation and climate field schools for local farmers in Bali and East Nusa Tenggara! So, be part of the giftmakers now! Grab it fast on tokopedia.com/su-reco

Gift Maker Program: Internship at su-re.co

be-tank

As of 2020, we are offering Giftmaker programs online. Due to the pandemic, we have been working remotely, thus it is no longer obligatory to come to Bali to participate in our Giftmaker programs.

Find out the opportunities for internship and how to apply on our website <https://su-re.co/internship/>.

Gift Maker Experiences – Michelle Ammaan

Su-re.co is open for students and graduates from all over the world to take the opportunity to do an internship (gift maker program) at su-re.co. This year, we have an intern coming from ETH Zurich, Switzerland. She is Michelle Ammann or known as Michelle.

She is a Swiss-Chilean and is studying Environmental Science at ETH Zurich. She absolved her obligatory internship of 4 month in su-re.co as a Research Assistant where she supported the research team in the different projects such as proposals, research papers and a policy brief.

After few months, Michelle feels that she definitely learned some know-hows for research, like writing and on how project management works. This internship has prepared her for her upcoming studies and I also learned more about her working style.

“If you have the chance to make an internship in a country you never have been, I would take it, as it can give a new perspective to life and you can get to know a whole new culture. From doing an internship in a small company, such as su-re.co, can give you insights on a lot of different levels, from activities like coffee grinding to proposal writing and tasks regarding project management” closed Michelle.

Indonesia Becomes One of the EU-funded Research Projects' Case Studies

(Continued from front page)

..misalignments between (inter) national climate policy goals and local priorities. To mitigate the emission and climate impact in land-use and electricity sector, the potential and options of decarbonisation, clean cooking, and coal removal can be explored through specific case studies in Indonesia. Led by su-re.co, Indonesia case studies in LANDMARC and TIPPING+ project will focus on the scientific assessment of decarbonisation processes through biogas and compost, and policy engagement to enable clean-energy transition in coal- and carbon-intensive regions like Indonesia. Stay tuned for the projects update!
