

What is su-re.co?

su-re.co info

Established in 2015, su-re.co (Sustainability and Resilience) is an environmental Think-Do-Be-Tank based in Bali. Our vision is to be the giftmaker for the earth. To achieve this vision, we set a mission. We deliver well-thought outcomes because we need scientifically proven sustainable and resilient solutions. We work on think, do, be activities, together.

As our biogas is small and portable, we can transport it easily to other regions. In this pandemic situation, this flexibility is even more beneficial! This time, we are glad to introduce our biogas technology to PT Jawa Power. Just by following our instructions, they can install the biogas correctly by themselves, without even calling. How nifty!

can create and install your own biogas by yourself!

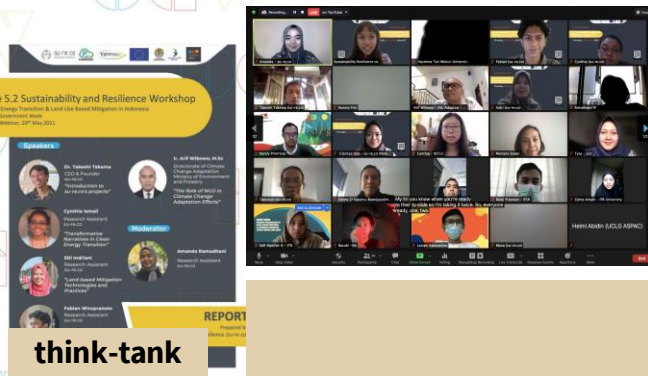

Save the date! Saturday, August 14th, 2021, from 8.00-15.00. In this workshop, we partner with Jiwa Community Garden as the installation site.

Check Out the 5.2 Sustainability and Resilience Report

Following the 5.1 Sustainability and Resilience Workshop in March 2021, we held its second workshop, as part of the event organized by Open Government Week in May 2021! The workshop aimed to strengthen the communication and collaboration between stakeholders. The workshop brought in three projects that su-re.co is working on: TIPPING+ (2020-2023), IKI Small Grants (2021-2022), LANDMARC (2020-2024). The report is now published! Check out bit.ly/52srw

Fun Fact: Do-Gifts Best Seller

One of our best sellers, su-re.coffee is made of 100% single-origin arabica coffee from Bajawa, Flores, Indonesia. It is produced by our farmers where 15% of the wholesale will be given back to them as renewable energy and organic fertilizer. su-re.coffee is medium

roasted, fully washed. You can taste the sweet flavor of each coffee bean from every cup you have. Give it a try now! su-re.co/things-we-make

su-re.co x Green School Bali

We are starting our collaboration with Green School through some fun activities! Since we have officially signed our partnership with Green School, we started to have mini training once hosted by su-re.co and Green School.

On June 22, su-re.co and Jalak Bali by Rumi held a Coffee Dye

Workshop for Green School students. We used leftover su-re.coffee grinds to create beautiful brown dyes! Natural dye from su-re.coffee is one of the natural fabric coloring techniques that is eco-friendly.

A week later, on June 30, before the lockdown policy was applied in Bali, we had a bamboo workshop at our office. Led by Gusde and Tirta

students of Green School Bali, this fun and progressive workshop challenged us to use our creativity to create mockups of building structure using small pieces of bamboo! Did you know? Bamboo is one of the strongest and most sustainable and building materials!

Recently, we had an introductory session of our first upcoming event "EX (Exchange, Explore, Experience) with Green School" in collaboration with Green School Bali and Tigermove Japan. The participants are the Japanese elementary students from Showa Gakuin School.

The Exchange program is a 3-day program that will be conducted from August 4-6, 2021. The participants will learn about SDGs and environmental problems and solutions in Bali. This program is completed by virtual tour, AR experience and online interview with the locals.

Stay tuned for the updates!
