

Established in 2015, su-re.co (Sustainability and Resilience.co) creates a meaningful sustainable culture **from local villages to global societies.** Our mission is to be a gift-maker delivering a sustainable meaning in scientific knowledge, craft, and ourselves. We believe consistency is a key to create a resilient company and society, hence we go by the values of **think sustainable, do sustainable and be sustainable.** We create our story of the **primaculture**, together.

Travelers spend only 5 minutes of driving to beaches and can just walk to find some cafes....to be continued in the next page)

fun fact

Another Challenge to Develop Biogas

Biogas has potential to improve the wellbeing of vulnerable rural communities but the challenge is to find pathways to overcome well-established technologies and practices in the current heavily fossil fuel based energy system (Bobner et al., 2019).

Biogas for Eastern Indonesia

Su-re.co also supports coffee farmer in Flores, East Nusa Tenggara. On June 19th 2019, a biogas digester which was supported by Montessori School Bali, was successfully installed at Pak Darius' house who is one of coffee farmers in Flores. Su-re.co hopes this biogas can help farmers to get better access to clean energy and reduce carbon emission for better climate!

su-re.coffee Project at Bioeconomy Seminar

The founder of su-re.co, Takeshi spoke about Takeshi Takama joined a su-re.coffee which is a public talk in bioeconomy at Royal Swedish Academy of Agriculture and Forestry in Stockholm, Sweden on June 13, 2019. At the session, EC TRANSrisk and Green Win with Stockholm Environment Institute and Udayana University.

A Biogas Digester Installed in Bedugul, Bali

Following the project implementation in Flores, su-re.co team installed one more biogas digester for local farmer in Candi Kuning, Bedugul which is located in Northern part of Bali on June 13, 2019.

Team from su-re.co worked together with Bapak Made Subamia who grows vegetables on his farmland to install this digester. Although the day was raining, we kept eager to help farmer to get better access to

clean energy. However, as the lesson learned from the previous installations, the problem in installing biogas digester was in the maintenance therefore we would like to make sure the farmer can take care of the

Biogas installation in Bedugul (doc: su-re.co)

biogas digester. During the installation, our team also explained to the farmer about how to feed the digester and to maintain it to make sure the biogas digester works well.

We are also going to prepare for the next installation for local farmers around Bali and Indonesia as a real action to reduce carbon emission that causes climate change on earth. Stay updated!

Jean-André, Emily and Pak Subamia are working together to install the biogas digester
