

What is su-re.co?

su-re.co info

Established in 2015, su-re.co (Sustainability and Resilience.co) is an environmental Think-Do-Be-Tank based in Bali. Our homework is to create a **sustainable and resilient community (be) that can transform good intentions and deep thought (think) into direct action (do).** su-re.co is a **gift-maker** delivering a sustainable meaning in **scientific knowledge (think), craft (do), and ourselves (be).** Our mission is to realise the vertical integration of sustainability, which synergises research, technologies, and learning into meaningful business. In short, su-re.co's strategy is "a **vertical integration for sustainability**".

People in Japan Will Soon Be Enjoying Indonesian Chocolate!

do-tank

WE have been supporting Coffee and Cocoa farmers since the start of our projects, as they are one of the most vulnerable groups in receiving the impacts of climate change. Through our su-re.cocoa product, we help the farmers market their product with fair price so they can have a better livelihood and in return, some of the sales will go back to them in the form of biogas digester and Climate

I Made Sugandi is one of the cacao farmers from Jembrana, Bali. He had the chance to live and work in Japan and realized that Japanese people

Did you know?

Science updates!

Everything we do is scientifically proven. Check out our most recent publications to learn more about the technical research aspects behind our activities.

Behind the Projects

Behind every successful or even failed project, a lot of efforts must have been made to achieve the goal. At su-re.co, we support each other as a team to make our think-do-be tank projects a great success. But have you heard of the stories behind it? ☺ Starting last year, our giftmakers have consistently sharing their thoughts, experiences, or even some inspiration in a blog post! Every day, on our website : www.su-re.co/blog, you can enjoy at least 2 new articles. We will also be happy to send you a notification once a new article has been published. Feel free to sign up and subscribe to our website ! Happy reading!

be-tank

We are looking for interns who will work together with our team from all over the world! Whatever your background is, you can take a part in achieving sustainability on earth by working from your home.

A few positions are available. Check our su-re.co/hiring-and-internship for more details!

A Fresh Passion to Face the New Year

We have passed the first month of 2021. Time flies! We hope you are all staying safe and healthy in your country and slowly enjoying the new normal, e.g. online meetings, online courses, etc. We at su-re.co are also adapting to the situation. It has almost been 10 months

since we started working from home!

In January, we started working with new hope and new collaborations! We started the new year with the first meeting of our on-going research project – TIPPING+, funded by the European

Commission. Furthermore, we had also a meeting with BPPT (Badan Pengkajian dan Penerapan Teknologi) to discuss our potential collaboration for our biogas project

Utilizing the online communications platform is now essential to deliver knowledge and

messages in this pandemic situation. This year, we started our online webinar, in collaboration with Enter Nusantara, an NGO with a focus in tackling climate change through renewable energy.

Around 60 participants ranging from students, researchers, and professionals joined the discussion on a Thursday evening. It is just the beginning! We will have more webinars in the upcoming weeks. Stay tuned on our instagram @su_re.co!

headline liaison

People in Japan Will Soon Be Enjoying Indonesian's Cacao Product!

(Continued from front page)

love chocolate. However, cacao does not grow well there. After coming back to Bali, he decided to be a cacao farmer so the people in Japan can have as many chocolate as they want. Following the success story of Pak Made, in January we help him to export 2 tons of cacao to our partner Jin-apan! They will then turn the cacao into some varieties of sustainable product. Like what? Stay tuned!
