Cleaning Up the Echo Beach Canggu in The Pandemic Situation

Bali's Biggest Clean Up is an annual clean up event organized by One Island One Voice or Satu Pulau Satu Suara. Everyone propose a certain site to be clean up and coordinate the action!

After the first su-re.co clean up action in Munggu Beach last year, this year su-re.co giftmakers are back in action to clean up Echo Beach in Canggu.

We also invited some visitors and everyone on social media to join the action. We keep maintaining health protocols by.....to be continued in the next page.

Did you know?

Science updates!

Everything we do is scientifically proven. Check out our most recent publications to learn more about the technical research aspects behind our activities.

Finally Meeting the Farmer! Thanks to Technology

su-re.co conducted a 3-days program -- Salesio coffee program with Japanese students and TigerMov to learn about SDGs-climate change and coffee production. In this program, we got a chance to invite Pak Rikardus, our farmer from Bajawa to share his experiences with farmers as well as about sustainable coffee.

We are glad that the students enjoyed the session, and they were actively asking questions and explore their curiosity about coffee production.

Sweetness and Conservation in One Package!

We are all have a role to play. Please support us!

su-re.co in collaboration with Lindungi Hutan launches a special package combining the delectable climate smart coffee and chocolate with environmental

conservation. This small action is both meaningful for humans and nature. If you are interested, please check detail information about these packages on our website www.su-re.co/shop.

Road to LANDMARC and TIPPING+ Kick Off Workshop

Did you know? Indonesia becomes one of the focuses of European Commission project on renewable energy. After their first launch in June and July 2020, LANDMARC and TIPPING+ will have their first kick off workshop in mid-March 2021!

All invited attendees will be able to join the online workshop and we will be sharing the updated information to public on our social media. So, make sure you keep an eye on all our social media channels. You may be wondering, what is the difference between LANDMARC and TIPPING+?

With the support of BMKG and BAPPENAS, the LANDMARC H2020 Research Project on Land-based negative emission solutions will explore the potential of carbon storage through biogas and compost in Indonesia.

However, TIPPING+ will explore tipping points toward clean-energy transition in Indonesia especially on the removal of coal use in electricity system in Banten and promote biogas installation at household level in Bali from the policy viewpoints.

Both of these projects are open for collaborations with fellow research projects operating in our case studies. Contact us through email info@su-re.co!

Cleaning Up the Echo Beach in This Pandemic Situation

(Continued from front page)

wearing masks, using gloves and washing our hands frequently. The trash collected was separated based on its types such as plastic bottles, straws, bags, cutleries, etc. Thankfully, the team from Sungai Watch was there to pick up the trashes. We hope this pandemic situation will not stop us to make an impact to our planet.
