Local farmers are installing biogas digester(doc : su-re.co)

## Another Biogas Digester was Installed in East Nusa Tenggara

do-tank

**O**ne by one, our dream to provide better access to clean energy for farmers come true. This month we were busy installing biogas in several places. For farmers until private sector.

One of the touching heart stories come from biogas installation in East Nusa Tenggara. After conducting the second Climate Field School to build capacity of farmers to adapt with climate change, su-re.co

that was represented by Mayun worked together to install a biogas digester in there. ....

### Did you know?

### Energy Ladder

**T**he idea of energy ladder is that people move from dirty to clean energy sources as income increases. The key is that people stop using the dirty source when cleaner source is established. They step up the ladder, from wood to kerosene to electricity (Energypedia.info).

Mini biogas digester made by our intern

think-tank

### Mini Model of Biogas Digester

What does the biogas look like in mini version? Raphael of su-re.co developed a mini model of biogas digester. Generally, a biogas digester consists of bag and pipes as the inlet, outlet and to connect gas with a stove. Come visit our office to see and learn more about biogas system!

### su-re.co is looking for a Gift Ambassador!

do-tank

As a gift ambassador, you can support Indonesian coffee and chocolate farmers that are fighting against climate change by delivering their gift to buyers from your country/ area of residence.

Register yourself by mentioning your name, country, and date of your return flight at **+628123831727** or **info@su-re.co**.

## Taking Action to Save the World from Climate Change

On the day that students are striking across the globe, as part of Friday for Future, su-re.co in collaboration with Born Bright Bali, Cinema Without Wall, New World Together, and My Red Envelope arrange a follow up event, dedicated to support the

movement for Climate Action in Bali on September 20, 2019. There were free espresso martini provided by su-re.co for the first 40 participants.

It is such a pleasure to take part of this global action. Thank you for all

of change makers that has been working hard to find solution for the better climate of our Earth. This success of this would not be happen without a great collaboration between our staff, interns and partners. All our team from various division worked

together to make it happen.

One of them is Casper, who just finished his internship in September. He was part of the Green Business Development team. On the last day of his internship, he sent his message for the next interns "Just do it, it's gonna be fun!"

Are you interested in becoming an intern at su-re.co? Contact us at [info@su-re.co](mailto:info@su-re.co).

### Another Biogas Digester was Installed in East Nusa Tenggara

*(Continued from front page)*

Previously, we have installed one biogas digester for farmer in East Nusa Tenggara and today they have been using biogas for cooking. They looked so happy while cooking with this eco-friendly source of energy. We hope this story can inspire more people to start using biogas for their lives and against climate change together!
