

Established in 2015, su-re.co (Sustainability and Resilience.co) creates a meaningful sustainable culture **from local villages to global societies**. Our mission is to be a gift-maker delivering a sustainable meaning in scientific knowledge, craft, and ourselves. We believe consistency is a key to create a resilient company and society, hence we believe in the values of **think sustainable, do sustainable and be sustainable**. We create our story of **the primaculture**, together.

Helping Farmers to Tackle Climate Change through Climate Field School (CFS)

think-tank

Su-re.co staff and participant of the second CFS(docs : su-re.co)

Last year, su-re.co started Climate Field School to develop the capability of farmers in adapting to climate change. Climate change has been changing the level of precipitation in farmland, hence farmers must be able to adapt to this condition.

This year, CFS was conducted at Climate Station II office of BMKG, in Kupang, East Nusa Tenggara. Su-re.co partnered up with BMKG and Stockholm

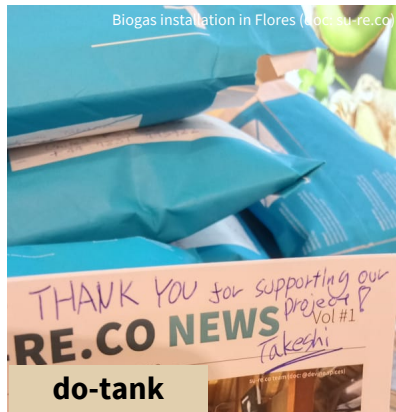

Presentation from BMKG (doc: su-re.co)

Environment Institute (SEI) to implement this program. This year's CFS was the first for coffee and cacao farmers ...to be continued in the next page

fun fact

Bajawa Coffee

Bajawa coffee is recognized as one of the best coffees from Indonesia. Bajawa that is located in Ngada Regency, produced 535.5 ton of arabica coffee in 2017 or 42.51% arabica coffee of Ngada was produced in Bajawa (Central Statistics Agency of Ngada, 2018)

Thank you for supporting su-re.coffee project

As the follow up action of su-re.coffee crowdfunding, su-re.co started to send packages of coffee for the backers in Europe and Japan. Thank you for your supports! It goes to biogas digester installation and climate field school for local farmers in Indonesia.

Message from the Society for Future Energy

Su-re.co's biogas was displayed at Sunday Market that was organized by Born Bright Bali. Visitors from kids to adults shared their message and appreciation for coffee and biogas project on

su-re.co's biogas digester that will be installed in East Nusa Tenggara. Some kids also were also leaving their drawing on the biogas digester!

Internship at su-re.co

Su-re.co is open for university energy, but we also open for students and graduates to other major of studies to experience the working experience our think-do-be tank environment through internship projects. Interns come from program. su-re.co's interns mostly various countries namely French, have an education background in Germany, United Kingdom, environment and Indonesia, and many more.

Jean is showing how to make biogas digester (doc: su-re.co)

At this moment, su-re.co has 58 former interns and 6 active interns at the office. Before deciding to apply for an internship at su-re.co, here is a testimonial from Jean, who just finished his internship at su-re.co.

"The global functioning of the company helps me to understand how to concretize a project. Thanks to all the transversal skills that are inherent to an engineering project in the global south, research, intercultural communication, management, economy, marketing, entrepreneurship etc.. now I can more clearly see how to build a project from the idea. The Think-Do-Be organization seems very efficient for that."

Jean-andré Davy Guidicelli- one of su-re.co's former interns

headline liaison

Helping Farmers to Tackle Climate Change through Climate Field School

... in Kupang, since the facilitators of coffee and cacao previous CFS was conducted farmers from Bajawa joined the CFS for corn and rice farmers. On in Kupang. During the training, the June 26, 2019, several facilitators were given some

information and knowledge about climate, hence these facilitators can share the knowledge to farmers groups in their neighborhood.
