

What is su-re.co?

Established in 2015, su-re.co (Sustainability and Resilience.co) created a **sustainable and resilient community** (be) that can turn **goodwill and deep thought** (think) directly into **meaningful action** (do).

Our mission is to be a **gift-maker** delivering sustainable meaning in scientific knowledge (think), craft (do), and ourselves (be) hence we believe in the values of **think sustainable, do sustainable and be sustainable**.

THE CLIMATE SMART GIFT

"A gift from farmers, to you, your family and friends and back to the environment."

 Vol #16

WWW.SU-RE.CO

The New Climate-Smart Product : su-re.cocoa gluten-free cookies

do-tank

Healthy snacks don't have to be unpleasant! Here we introduce our new product, su-re.cocoa gluten-free cookies. These gluten-free cookies are made with the delicacy of su-re.cocoa, the organic chocolate from local farmers in Tabanan, Bali in collaboration with primochocolato.

More than tasty! A box of su-re.cookies will have impacts on our climate, the farmers and

ourselves, as 25% of sales goes to renewable energy and climate education for farmers to adapt to climate change...(see next page)

Why Biogas?

Why did we choose to develop a biogas energy alternative, and how did we deal with the risks and barriers that came with it? su-re.co and SEI (Stockholm Environment Institute) collaborated to create a brief that envisions the future of biogas usage in Indonesia.

Meet the Farmers : Gusti Cakra from West Bali

Indonesia has very fertile ground for coffee to grow. Indonesian coffee from Gayo, in Sumatera to Bajawa, in East Nusa Tenggara, is well-known for the delicious taste of their coffee.

su-re.co has been working together with local farmers in Bali as well as in East Nusa Tenggara to get a better livelihood by marketing their products and installing biogas digesters that can be useful in their daily lives.

Gusti Cakra is a pioneer in his community in implementing sustainable agricultural practices.

After experiencing losses in his rice field several years ago, Pak Cakra realized it was time to switch from rice to a more sustainable and resilient alternative. He began experimenting with coffee and cacao, using cacao trees as shade trees for his coffee plants. Today, his agro-forest is producing coffee and cacao with a healthy and abundant harvest. His success has attracted over 20 farmers in his community to learn from his sustainable methods. Pak Cakra is educating willing farmers and providing them with his exceptional cultivar. The coffee bean from Pak Cakra is also included in the su-re.cocoa, so you can enjoy both coffee and chocolate at once!
